Assignment 1

- Please try to configure Chrome Browser and navigate to https://www.jcpenney.com/
- Search for shirts and add the first item in the search list to cart
- Move till checkout and you can stop when it ask for login.

Code Description: In this prog I have automated Jcpenney website. While automating I have used xpath to find the element and perform the automation. Also I have used concept of Frame also to perform the click operation on checkout button. All other details are in the code.

```
driver.switchTo().frame("modalIframe");
    WebElement checkoutEle=
driver.findElement(By.xpath("//input[@value='CHECKOUT']"));
    checkoutEle.click();

driver.switchTo().defaultContent();
```

OutPut of the Prog: console screen shot.
